Travelling Experience

# ACUITIMOBI

## Future of Transportation

The use of Mobility as a Service (MaaS) platform can enhance your public transport experience and makes this concept even more clear and certain.

This immense platform enables you to rapidly test the important strategic and operational decisions for global transportation in the digital world – taking away the risk of expensive assumptions and sunk costs.

## Why AcuitiMobi?

'AcuitiMobi' is a mobility as a service application by Acuiti Labs for individuals (who frequently use public transport) to use as a mode of transportation.

This is an on-demand, real-time platform which includes different combination of transport methods like a car and bike sharing, taxis, and car rentals/leases, trains, buses, and offers its customers everything that is essential for an effortless traveling experience. Right from the user's travel plan to easy payments, all this is included in MaaS.
